For applying adhesives, creams, greases, oils, pastes, resins, sealers, single part epoxies and more, we offer the top-quality needles, syringes and plastic bottles that you need to accurately dispense materials. All products are produced and stocked in quantity, so your order will benefit from bulk pricing and rapid shipping.

Any custom needles can easily be manufactured to order with our standard plated brass or stainless steel hubs.

STAINLESS STEEL NEEDLE BLUNTS

Disposable, leak-free and affordable, these needles are perfect for a variety of dispensing operations and can be pre-bent if required.

- 304 Stainless steel tube with blunt 90° end
- Polypropylene luer lock hub
- Color-coded by gauge for easy identification
- Anti-static construction
- May be reusable (depending on application)

PTFE AND POLYPROPYLENE NEEDLES

Ideal for adhesives that clog easily, these non-stick needles prevent bonding to offer enhanced flow.

- Polypropylene luer lock hub
- Won’t scratch delicate surfaces
- Chemical-resistant
- Can be cut to shorter lengths with scissors
- Flexible for hard to reach places

TAPER TIP NEEDLE

Designed for the optimal dispensing of viscous fluids, the conical shape of these taper tip needles creates less backpressure, resulting in fewer drips.

- Molded from polyethylene
- Integrated luer lock hub
- Can be cut shorter for larger opening with scissors

NON-STERILE, OUR NEEDLES ARE PERFECT FOR PRODUCTION, MAINTENANCE AND LAB OPERATIONS IN THESE INDUSTRIES:

AEROSPACE | DENTAL | ELECTRONICS | INDUSTRIAL | MEDICAL

Tel: 888-VITANEEDLE | Web: WWW.VITANEEDLE.COM
RAZOR EDGE NEEDLE

For absolute dispensing precision or punching holes in soft solids, our sharp-tipped razor edge needles are available in standard or custom lengths and gauges assembled to plated brass luer lock hubs.

SYRINGES

Useful for dispensing, Vita Needle offers a wide variety of polypropylene syringes in manual and air-operated configurations (without plunger for use with dispensing machines). Choose from luer lock to mate with our needles for precision jobs, or taper tip to apply your product directly, without a needle.

• Translucent with calibration marks on most sizes for easy measuring
• Small quantities to hundreds of thousands
• Accurately place material using a manageable amount of product
• No need for cleaning—simply throw away
• Taper tip syringes can be cut shorter with scissors for a larger orifice

PLASTIC BOTTLES

STANDARD BOTTLES

• Store upright for easy access
• Luer lock top creates leak-free connection to needle, hose, equipment or tip cap for an air-tight seal
• Sturdy polyethylene construction lasts a long time
• Available in a variety of sizes (1 ounce to 8 ounce)

ACCORDION BOTTLES

• Press fit tops with luer lock connection
• Easily compress with light pressure
• Reduced material waste versus standard plastic bottle
• Blends grip feature of syringe with easy stand up feature of bottle

EXPERIENCE MAKES A VITAL DIFFERENCE

Whether you require a standard off-the-shelf reusable needle or a sophisticated, completely custom solution, you’ll find exactly what you need at Vita Needle. Tap our generations of experience. Take advantage of our fast fulfillment and delivery times. Enjoy our world-renowned commitment to service.
